Professional Summary

Motivated Full-Stack Developer with experience designing and implementing clean, testable code and scalable web architectures. Strong understanding of web design principles, cloud computing (AWS fundamentals), and version control practices. Skilled in Java, PHP, Python, TypeScript, and JavaScript. Experienced with modern frameworks such as Angular and React for building dynamic, responsive user interfaces. Thrive in collaborative Agile (Scrum & Xtreme) environments — actively contributing to sprint activities, refining requirements, and improving user experience. Highly detail-oriented, eager to build and test production-quality solutions, and excited to contribute to innovative projects that empower users and drive product growth.

Education

Diploma in Computer Information Systems

Okanagan College – Kelowna, BC -2025

Bachelor's Degree in Industrial Automation

University of Cauca –Colombia- 2016

Technical Skills

- Frontend: HTML, CSS, JavaScript, Angular, React, TypeScript, Bootstrap, Tailwind
- CMS: WordPress, Drupal (basic)
- Backend & Data: Python, Java, PHP, SQL (MySQL), Django, AWS amplify.
- Tools: Git/GitHub, VS Code, Unix/Linux shell, Jira
- Testing: Manual testing, Test case creation, UI testing with browser DevTools, Java unit testing
- Other: RESTful APIs, Responsive Design, Agile/Scrum fundamentals, SDLC

Projects

Fitness App –Angular, PHP API & MySQL.

- using Angular and TypeScript for the frontend and PHP/MySQL on the backend.
- Includes user authentication, exercise tracking, food intake logging, profile management, and a dashboard to visualize progress over time.
- Applying component-based architecture and service-driven state management.
- Performed UI testing to validate input handling and user flow across dashboard and log features

Student Group Website- WordPress – <https://studentbranches.ieee.org/ca-oc/>

- Co-developed a public site for IEEE student branch using WordPress.
- Followed Agile Scrum methodology: participated in requirement gathering with client and iterative delivery.

- Customized the IEEE official theme and plugins such as “Gravity Forms”, “The Events Calendar”, and “WPBakery Page Builder” to meet client needs.
- Ensured compliance with IEEE branding standards to deliver a responsive and professional design.

Budget Tracker- LAMP Stack

- Built a web-based app using the LAMP stack to help users track expenses, categorize spending, and visualize financial data over time.
- Refactored code to prevent SQL injection and improve data security, applying separation of concerns for maintainability.

Movie Recommendation Web App- Java & MySQL

- Developed a dynamic web app with JSP, Java Servlets, and MySQL.
- Integrated a movie API to provide personalized recommendations with user authentication and a dashboard manager.

Experience

IT Lab Monitor – Okanagan College Library

Jan 2024 – Apr 2025, Kelowna, BC

- Provided software and hardware troubleshooting for students and staff, resolving technical issues efficiently.
- Ensured proper operation of lab systems and administered basic configurations.
Delivered user support to improve accessibility and successful use of campus technology resources.
- Reported recurring issues and supported documentation to prevent repeat incidents.

Interests

Gaming, electronics repair, basketball.
